Languages: Swedish (fluent), English (advanced), Polish (fluent)

## Profile

I have a background as a frontend developer with several years of experience in finance, health tech and ecommerce. During my time at ICA Banken, Nordnet and Mindler I worked with modern frameworks such as React, Next.js and TypeScript and built scalable solutions in cloud environments like Azure and AWS.

My technical focus expanded as I began formal training in .NET and backend development at Nackademin. This education prompted me to deepen my skills in C sharp, ASP.NET, databases and DevOps and helped me build a broader foundation that combines frontend and backend. My aim is to merge user centered frontend experience with strong backend knowledge so that I can contribute across the full development cycle.

## Education

Nackademin – Webbutvecklare .NET (YH), 2025 – 2027

Practical training in C sharp, ASP.NET, databases, DevOps, frontend, and cloud development. Work carried out in agile teams with Clean Architecture, SOLID principles, and test-driven development.

Cornerstone – Azure AZ-400: Designing and Implementing DevOps Solutions (2023)

Focus on CI and CD flows, version control, and security in Azure. Included hands on work with Azure Pipelines, Repos and Monitor. Provided strong understanding of automation and infrastructure as code in secure and scalable environments.

Cornerstone – Azure AZ-204: Developing Solutions for Microsoft Azure (2023)

Development of cloud applications and APIs using App Service, Functions, Storage and Key Vault. Strengthened my ability to build and deploy backend solutions with high availability in Azure.

AWS Academy – Certified Cloud Practitioner (2021)

Introduction to cloud development in AWS with practical work on EC2, S3, Lambda and CloudFormation together with fundamentals in security and networking. Provided clear understanding of how AWS services support modern development and DevOps workflows.

Södertörns University – Bachelor in Media and Communication Studies (2001 – 2006)

Studies in communication, journalism, and digital media with focus on information flows and technology.

## Experience

System Developer – ICA Banken AB (Nov 2022 – )

Improved platform performance and scalability through optimization of TypeScript code and automated tests in Storybook. Contributed to the migration of the bank's web applications to Next.js including cloud infrastructure setup in Azure and Terraform. Developed .NET APIs for smooth communication between frontend and backend and managed CI and CD pipelines together with logging in New Relic.

Software Developer – Mindler AB (Feb 2021 – Nov 2022)

Developed systems that support psychologists in patient management and scheduling using React, React Native and Node.js. Built serverless microservices in AWS Lambda and implemented Cypress tests in the CI environment.

Frontend Developer – Nordnet Bank AB (Feb 2019 – Feb 2021)

Built user interfaces for financial products in React, Redux and Next.js. Contributed to the development of Nordnet's global component library in Storybook.

Frontend Developer – Knowit (Jan 2018 – Feb 2019, Stockholm)  
Developed pages for ethical savings using Angular and jQuery. Introduced a shared UI kit with Fractal and migrated the codebase to ES6.

Frontend Developer – Wunderkraut Sweden (Jan 2017 – Jul 2017, Stockholm)  
Created marketing automation flows and digital campaigns in HubSpot which increased customer lead generation.

Frontend Developer – PwC Sverige (Jan 2015 – Jan 2017, Stockholm)  
Developed CMS templates in Adobe Experience Manager and WordPress and created landing pages and email campaigns for marketing.

## Technical skills

Languages and frameworks: C sharp, .NET, TypeScript, JavaScript, React, Next.js, Vue  
Tools and platforms: Azure, AWS, Terraform, Docker, GitHub Actions, CI/CD, Playwright, Storybook, Cypress, Datadog, Jira, Confluence, Figma, New Relic  
Industry experience: Finance, health tech, audit, ecommerce
